EXPERIENCE

Systems Specialist • City of Carson

Carson, CA • Present

- Serve as the City's **cloud** subject matter expert for **AWS** and **Azure**, advising on cloud services and guiding the City's cloud adoption as its footprint grows
- Maintain the City's evolving **AWS** and **Azure cloud infrastructure**, support architecture decisions, and administer planned service and feature upgrades as new capabilities are introduced
- Led the citywide multifunction printer (**MFP**) refresh end to end: ran the **RFP** from posting through vendor selection, delivery, and City staff training, held vendor meetings, configured the **print server**, and scoped **Active Directory** print groups, deploying to the entire City with zero downtime and upgrading the production repro printer fleet in the same effort
- Led part of the City's **ticket management system** migration, adding automation and self service workflows that reduced **Tier 0 tickets by 30%** and let staff resolve common requests without IT intervention
- Provide technical support for the City's **LAN/WAN** and computer systems, troubleshooting network, server, workstation, and peripheral issues across a citywide municipal footprint serving over 500 users in 10+ departments
- Maintain user accounts, email accounts, and access rights across **Microsoft 365**, **Entra ID**, and **Active Directory**, managing group memberships and least privilege access reviews for city staff in every department
- Provide **VIP technical support** for the City Council, City Manager's Office, department directors, and other members of the City's executive team, resolving time sensitive issues across devices, accounts, meetings, and City systems

IT Support Engineer • MediaAlpha

Los Angeles, CA • 2021 – 2023

- First point of contact for companywide IT across **Windows** and **macOS** fleets at a publicly traded advertising technology company, triaging and resolving hardware, software, network, and access issues within SLA for a hybrid workforce
- Administered enterprise identity and **SSO** as the company's **Okta** administrator, owning user and group provisioning, access policies aligned with **RBAC**, application assignments, and prompt deprovisioning at termination across **Okta**, **Google Workspace**, and **Microsoft 365**
- Configured and maintained **Okta** SSO application integrations for the internal **SaaS** stack, managed application specific permission tiers and access policies, and resolved advanced issues beyond Tier 1 troubleshooting
- Administered the internal **SaaS** account lifecycle (provisioning, procurement, license reconciliation, onboarding/offboarding) in support of **SOX** and **NIST CSF** compliance controls, including access reviews and audit evidence for identity controls
- Managed the IT ticket queue end to end in **Jira**, documenting resolutions and escalation paths; authored SOPs and knowledge base articles that cut repeat tickets for common issues

Technical Support Specialist • Infineon Technologies

El Segundo, CA • 2018 – 2021

- Led the **hardware rollout** as primary technical point of contact during the company's acquisition of a subsidiary organization: imaged, provisioned, and deployed workstations for the newly onboarded workforce with zero disruption to ongoing operations
- Owned the full employee **onboarding and offboarding** lifecycle (account provisioning, asset issuance, access setup, and secure decommissioning) for a global semiconductor company's California site
- Administered accounts and access in an enterprise environment managed with **Active Directory**: provisioning/deprovisioning, permissions, and password/account recovery support

- Tracked and audited hardware inventory, including warranties, documentation, and lifecycle status, across hundreds of assets, maintaining audit ready records for a global semiconductor company
- Supported company **iPhones** managed through **MobileIron MDM**, including enrollment, email configuration, device swaps, and troubleshooting

Help Desk • California State University, Dominguez Hills

Carson, CA • 2017 – 2020

- Maintained, upgraded, and replaced hardware and application software across campus labs and staff workstations
- Led troubleshooting initiatives spanning networking, hardware, and end user software; documented resolutions in a reusable knowledge base

Records & Data Support • USC Card

Los Angeles, CA • 2015

- Led consolidation of physical departmental records into cloud storage, digitizing and organizing files to support officewide records modernization
